

Instructions

The purpose of this form is for an official government veterinarian employed by the competent authority of the exporting country to certify that:

- the animal being imported into Australia has been vaccinated against rabies.
- the veterinarian has sighted a rabies neutralising antibody titre test (RNATT) laboratory report that indicates the animal has sufficient antibodies.

This form covers cats and dogs imported into Australia under group 3 country conditions or non-approved via group 2 or 3 country conditions.

Before completing this form the official government veterinarian must ensure that all treatments, vaccinations, testing and collection of blood samples were performed in a country approved by the Australian government.

Strike through any errors (do not use correction fluid). Ensure corrections are legible, handwritten and signed, dated and stamped by the official government veterinarian.

* The list of approved countries for the direct import of cats and dogs to Australia can be found on the department's website at agriculture.gov.au/biosecurity-trade/cats-dogs/step-by-step-guides.
